

Majety Dedeepya

Azure Data Engineer | Databricks | PySpark | SQL | ADF

+91-6281869953 | majetydedeepya0@gmail.com | linkedin.com/in/majetydedeepya-data-engineer | Chennai, Tamil Nadu, India

PROFESSIONAL SUMMARY

Azure Data Engineer with 3+ years of experience designing, developing and deploying cloud-native ETL/ELT pipelines using **Azure Databricks, PySpark, Python and SQL**. Experienced in Delta Lake, Lakehouse Architecture, Azure Data Factory, ADLS Gen2, data migration, performance optimization and scalable data processing. Skilled in building enterprise-grade data ingestion frameworks, implementing complex transformations, optimizing Spark workloads and delivering secure data solutions using Unity Catalog in Agile environments.

EXPERIENCE

Associate – Data Engineer

Cognizant Technology Solutions

Oct 2025 – Present

Chennai, Tamil Nadu, India

- led the ETL migration from **Informatica PowerCenter** to **scalable Lakehouse architecture Azure Databricks**, reducing average pipeline execution time by 40% with ~30% infrastructure cost savings.
- Developed **Apache Airflow DAGs** using Python, version-controlled the pipeline code in GitHub, and managed and deployments through branching and pull request workflows to ensure reliable, collaborative pipeline delivery
- Designed and implemented scalable data ingestion ETL/ELT pipelines using Azure Databricks, Delta Lake, scalable **PySpark** and **Spark SQL** transformations to implement complex business logic, incremental data processing, and data validation for large-scale datasets
- Optimized Spark jobs and SQL queries through partitioning, caching and efficient transformations to improve execution performance.
- Collaborated with onshore stakeholders to gather business requirements and deliver cloud-native data engineering solutions.
- Implemented incremental file ingestion using **Databricks Auto Loader** with schema evolution
- Followed Agile development methodology and collaborated with cross-functional teams to deliver sprint commitments.
- Worked with Unity Catalog to implement centralized governance, fine-grained access control and secure data management.
- Supported CI/CD deployments using Git and Azure DevOps following branching and pull request workflows.
- Built ingestion, transformation, and consumption layers using the **Databricks Lakehouse** architecture following the **Medallion Architecture (Bronze, Silver, Gold)**.
- Built **Azure Databricks** notebooks, jobs, and workflows for data ingestion, cleansing, transformation, and quality validation using **Delta Lake**, ensuring reliable and auditable data pipelines.
- **Used Azure Data Factory (ADF)** to orchestrate Azure Databricks notebook execution and automate end-to-end ETL workflows across the data platform.
- Developed **ADF Copy Activities** to move Delta tables and datasets between Azure Data Lake Storage (ADLS) locations, supporting data movement and environment synchronization.
- Collaborated with 4 cross-functional teams to deliver 2 major Databricks-based cloud data platform initiatives on schedule.
- Enhanced the existing **Python-based Apache Airflow framework** to implement business requirements, automate ETL workflows, and orchestrate data pipelines alongside Azure Data Factory (ADF) and Azure Databricks notebooks.
- Executed **functional and regression testing** to validate that the **migrated Azure Databricks/PySpark** pipelines produced results consistent with the legacy Informatica PowerCenter implementation, ensuring data accuracy and business rule compliance.

Programming Analyst – Data Engineer

Cognizant Technology Solutions

Feb 2024 – Oct 2025

Chennai, Tamil Nadu, India

- Maintained and enhanced **Informatica PowerCenter ETL** workflows for multi-source integration, ensuring accuracy, consistency, and SLA adherence across critical data feeds.
- Developed and optimized **SQL** queries to perform data validation checks and exploratory data analysis across multiple source systems, ensuring data accuracy and completeness.
- Modified match-and-merge rule sets and trust score settings in Informatica MDM, refining survivorship logic to produce cleaner, more accurate golden records.

- Configured **Informatica MDM** processes using **SQL**-based match-merge rules to consolidate and deduplicate customer and product master records across disparate source systems.
- Delivered interactive **Power BI** dashboards with KPI scorecards, equipping stakeholders with self-serve visibility into operational metrics.

Programmer Analyst Trainee / GenC Intern

Feb 2022 – Mar 2024

Cognizant Technology Solutions

Chennai, Tamil Nadu, India

- Wrote **SQL** extraction scripts and shell-based automation to feed downstream reporting layers, reducing ad-hoc analyst requests by streamlining data availability.
- Supported PowerCenter workflow tuning and troubleshooting, gaining hands-on exposure to production incident resolution.
- Completed structured training in Python, cloud fundamentals, and data modelling; delivered a proof-of-concept internal tooling project as part of the graduate cohort.

TECHNICAL SKILLS

Programming Languages: Python (PySpark), SQL (Spark SQL), Databricks SQL

Big Data & Cloud: Azure Databricks (Delta Lake), Azure Data Factory (ADF), Azure Data Lake Storage Gen2 (ADLS Gen2), Apache Spark Structured Streaming

ETL / Data Integration: Informatica PowerCenter, Informatica MDM, Apache Airflow, ETL/ELT Pipeline Design

Analytics & Visualization: Power BI (Microsoft Certified), DAX, Data Analysis, KPI Reporting, Dashboard Development

Developer Tools: Git (CI/CD)

Concepts: Data Pipelines, Data Quality, Data Governance, Master Data Management (MDM), Cloud Data Migration

CERTIFICATIONS

Databricks Certified Data Engineer Associate – Databricks

Microsoft Certified: Power BI Data Analyst Associate – Microsoft

Data Modeling in Power BI – coursera

Preparing Data for Analysis with Microsoft Excel – coursera

SQL for Data Science – Coursera / UC Davis

Python Programming – Industry Certification

EDUCATION

Saveetha Engineering College

Bachelor of Engineering – Electrical, Electronics & Communications Engineering

Chennai, Tamil Nadu, India

2018 – 2022
